JS Ex-12 Declare two variables representing.js > ...

```
1 // declare two boolean variables
2 let isSunny = true;
3 let isWeekend = false;
4
5 // Logical AND (&&): true only if both are true
6 console.log("isSunny && isWeekend:", isSunny && isWeekend);
7
8 // Logical OR (||): true if at least one is true
9 console.log("isSunny || isWeekend:", isSunny || isWeekend);
10
11 // logical NOT (!): inverts the boolean value
12 console.log("!isSunny:", !isSunny);
13 console.log("!isWeekend:", !isWeekend);
14
```

PROBLEMSOUTPUTDEBUG CONSOLETERMINALPORTSFilterCode

```
[Running] node "e:\Internship\Sprint-2 javascript Task practice -2\Ex-12 Declare two variables representing.js"
isSunny && isWeekend: false
isSunny || isWeekend: true
!isSunny: false
!isWeekend: true

[Done] exited with code=0 in 0.116 seconds
```
